The Internet is moving forward into the next phase. And BIGLOBE will meet it there with a giant step forward into the era of cloud computing

Innovative changes are now taking place in the world of the Internet.

In addition to PCs and mobile phones, readily accessible digital devices are also enabling people anywhere at anytime to use various information and services on cloud computing systems. The results may be a never-before-imagined lifestyle or a significant business opportunity.

Greetings

New progress in network technologies is steadily expanding the possibilities of the Internet itself, bringing about the advent of an era in which “a diverse range of knowledge and information is combined, accumulated, and shared on cloud computing systems” and “anyone can utilize networked information and services from throughout the world via cloud computing systems.”

Being aware of the inherent changes of this era, we at NEC BIGLOBE intend to evolve into an “Internet Service Partner” that supports all in easily utilizing cloud computing services by always viewing our work from our customer’s perspectives and through employing advanced information technology.

As an accessible partner to individual customers, we will provide access to safe and reliable user environments as well as to abundant and exciting services. As a dependable business partner, we will provide our corporate clients with business solutions that offer the type of high quality and practicality they require.

BIGLOBE has accumulated highly reliable system construction skills and operating know-how through our many years as a Network Service Provider. This experience is the basis for the BIGLOBE Service Platform. Armed with this core asset, and through collaboration with NEC Group companies and alliance partners, BIGLOBE will continue to create valuable services that will help our clients realize their dreams.

You can expect the best from NEC BIGLOBE.

Hisao Iizuka
President
NEC BIGLOBE, Ltd.

Management Principle

Our Desire

**The joy of being connected and the satisfaction
in connecting**

Creating new value and a richness in society by bringing
people, corporations and society together.

As an Internet Service Partner in the era of cloud computing systems, BIGLOBE is realizing the dreams of each and every client

Our intention is to realize a “personal cloud” that allows each client to optimally utilize the vast amount of information and services on the Internet. Through BIGLOBE’s core businesses of ISP, Broadband Media, and Platform Services, we will work to create an Internet of the future that can respond to your requests for a specific type of service or new conveniences.

For our individual customers, we provide enjoyable and appealing cloud computing services. And for our corporate clients, BIGLOBE’s cultivated technologies and expertise enable platform services that support business expansion via cloud computing.

■ ISP Business

BIGLOBE provides a variety of Internet connection services to meet customer requirements, including FTTH/ADSL and high-speed mobile. In addition, we provide enhanced services to support a reliable and enjoyable Internet experience, including robust security services as well as a simple connection set-up.

■ Broadband Media Business

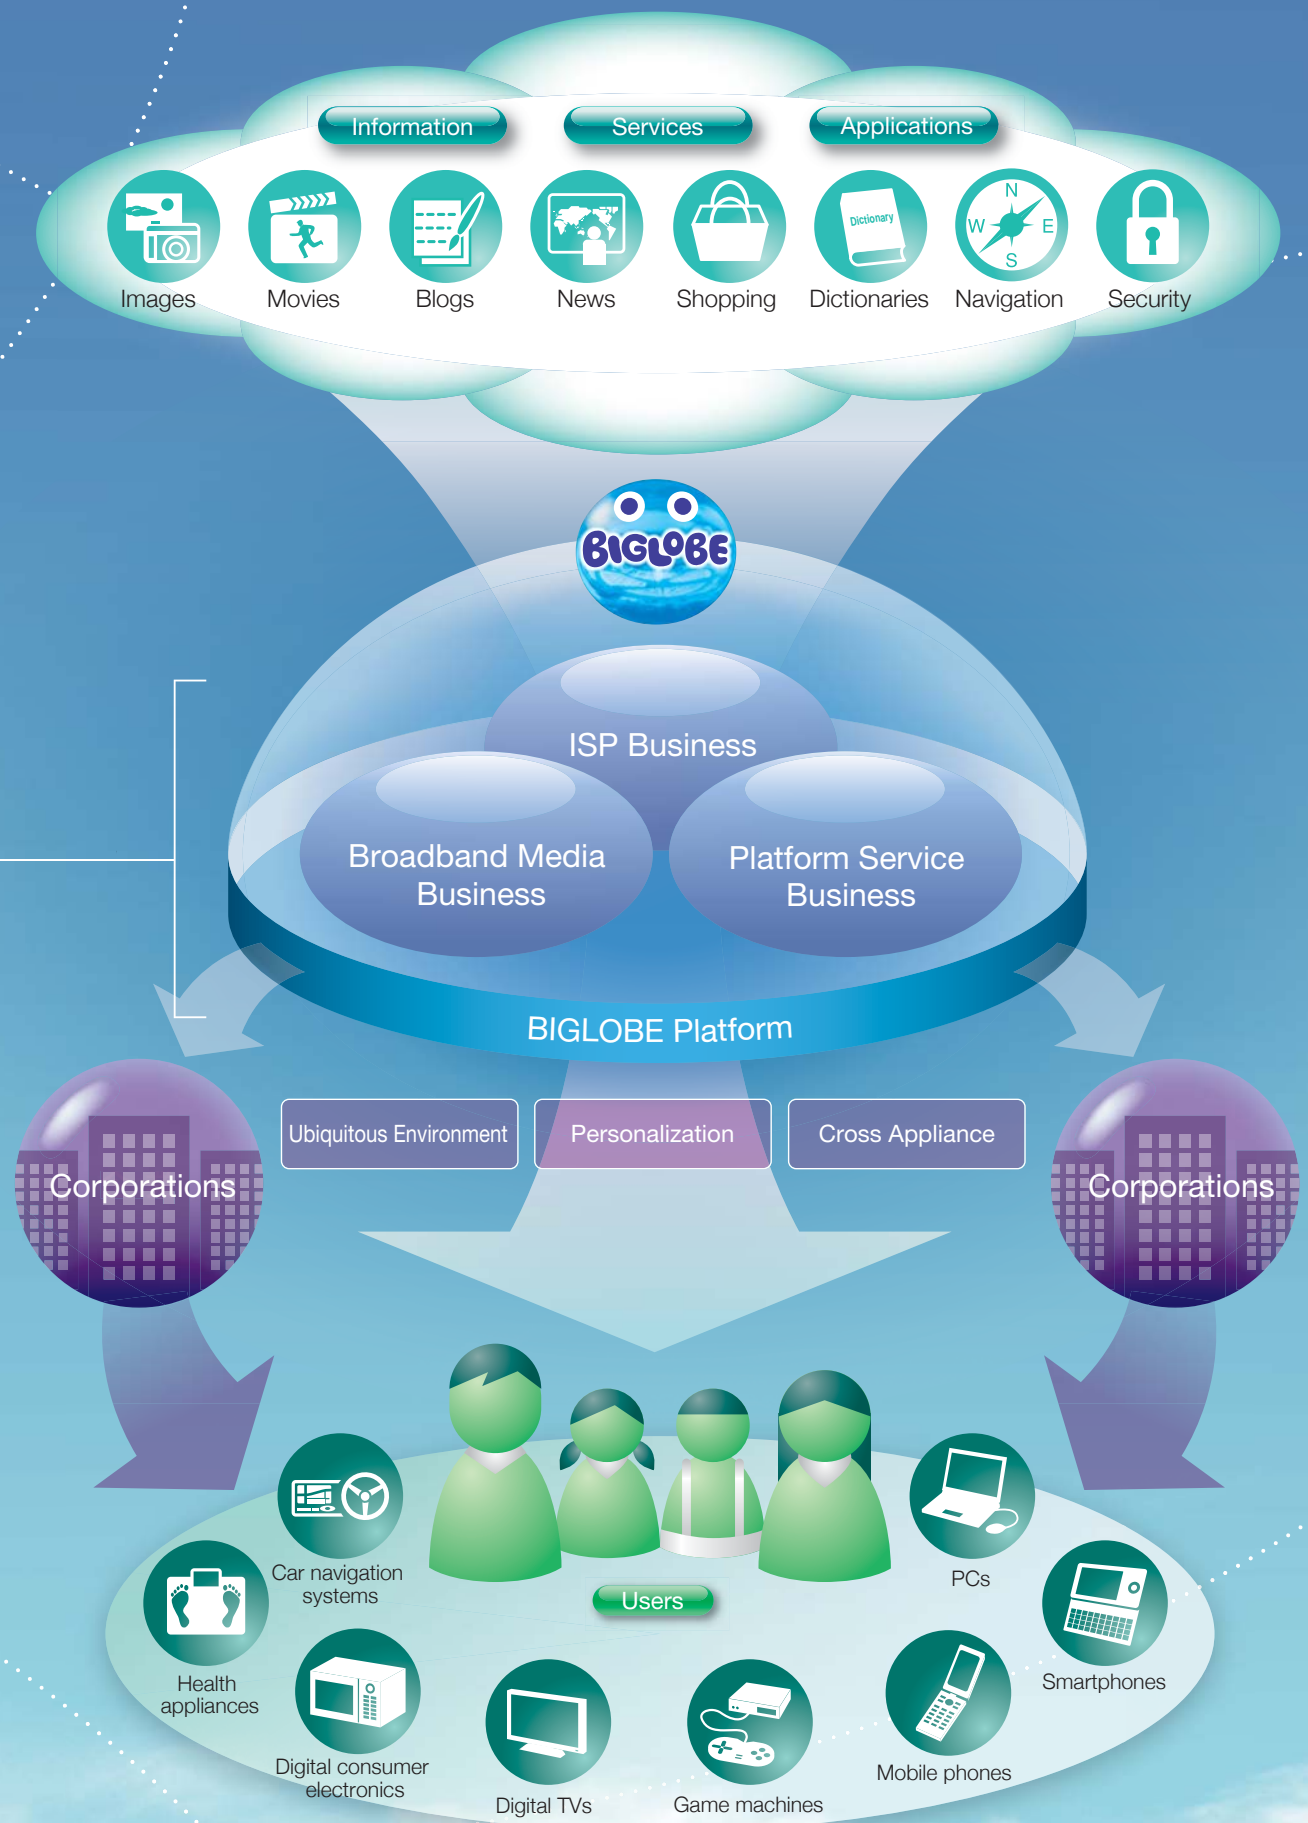

BIGLOBE provides an appealing array of contents such as portal sites that cover the latest data search services, EC sites and a wide-range of genres for computers, and mobile terminals. We are also striving to create new services that can link to various products including accessible electronic devices and digital home appliances.

■ Platform Service Business

Corporate customers can take advantage of BIGLOBE’s technologies and experience in Internet services and broadband media businesses. Solutions including Web marketing, EC, content delivery, and more are provided through consulting, SaaS, and/or system integration to increase our customer’s competitive advantage.

Three keywords to realizing Personal Clouds

- Anytime, anywhere easy connection to Internet services Ubiquitous Environment
- Personal and unlimited usage of desired services or information from a vast database Personalization
- Development of more convenient services by linking various devices Cross Appliance

ISP Business

BIGLOBE provides secure and enjoyable Internet service to anyone, anywhere

“Connection Services” that Expand

We provide our customers a variety of Internet access services to fit their lifestyles, including optical fiber, ADSL, mobile and NGN.

We are continuing our progressive approach in anticipation of the era of ubiquitous broadband.

We are also focusing on WiMAX and other mobile Internet access services.

In addition, we provide "BIGLOBE Auto-Connect," setting the ideal Internet environment to fit your use environment.

Secure and Convenient Internet Access (Optional Service)

Security measures are essential when using the Internet.

As a part of our standard service, we provide our main broadband customers with three security features.

The first of these features is an e-mail scanning, the second one is a spam filtering, and the third is a websites filtering.

BIGLOBE additionally provides "Security Set Premium," a security service offering increased safety.

And for your relaxation and enjoyment, we have "Hikari TV" television service.

Friendly "Customer Service" for Each of Our Customers

"My BIGLOBE" members page is made available for your use.

Look at this page to check your service usage status and various other settings.

"Marin no Kaiketsu Navi" responds interactively to users' questions, smoothly solving any problems.

BIGLOBE provides various data search services and appealing contents that fit the user's communication style

“Search Service” that Opens up New Possibilities

BIGLOBE provides various search services based on advanced technologies. We are actively pursuing new possibilities for "search services" through several developments such as "Burst Keyword Ranking," presenting the latest trends.

Search from various viewpoints

Top Page Search

Search for "what's happening now" using the latest popular keywords in

Popular Search Word Ranking

“Portal Sites” for word-of-mouth information posting and popularity analysis

BIGLOBE offers portal sites covering a wide range of genres including information on travel and going out, as well as entertainment-related information such as on animation, games and music.

We effectively analyze word-of-mouth and popularity information, transmitting it by fully utilizing our original Internet services.

Select a destination by checking sightseeing and word-of-mouth information

BIGLOBE Travel

Comprehensive portal sites for animation fans

ANIME ONE

The hobbies and lifestyle website for those around the age of 50

STATION50

Broadcasting a live baseball game in animation

Ikkyu Sokuhou

“Entertainment EC” linked various BIGLOBE portal sites

By cooperating with Tougenkyou, Inc., an affiliated company that has extensive experience in B-to-C entertainment auctions, we are working to enhance our EC business through combining innovative planning such as “auctions starting from one yen” with wide-ranging BIGLOBE portal sites.

Network Operation Center and Customer Support Desk

We have installed a "Network Operation Center" to monitor our services. This Center monitors our networks and servers 24 hours a day, 365 days a year. Also, for your convenience, our "Customer Support Desk" is available to answer any questions from our users. And questions related to Internet connection are fielded throughout the year.

In this way, BIGLOBE supports Internet access that is safe, secure and enjoyable.

Accumulated technologies and expertise utilize practical solutions to reinforce our customer's business

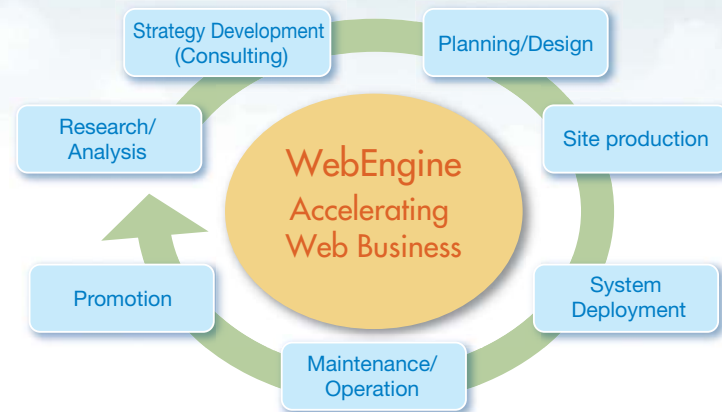

Platform Services for the Cloud Era

BIGLOBE supports any organization planning to activate its operations by providing a variety of services, including E-Commerce, online community, video distribution, etc. leveraging cloud-based technologies. These services are available through SaaS and/or customizable system integration to meet the needs of our customers.

BIGLOBE's experience in consumer services has shaped best-of-breed solutions that boost our customer's business and activities.

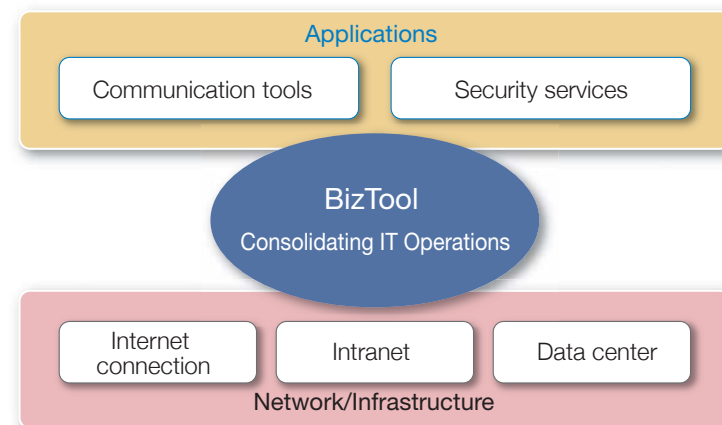

"WebEngine" Solutions to Support Web Marketing

BIGLOBE turns up the Web marketing of customers who are providing various consumer services. Our one-stop service portfolio covers everything about Web marketing, such as existing site survey/analysis, new site planning, site updating, deployment, operation, and promotion. Our goal is to reinforce our customer's business operations and to provide new opportunities.

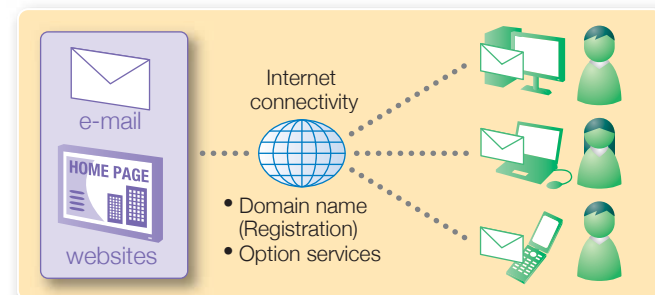

"BizTool" Solutions to Improve Business Operations

BIGLOBE helps stimulate organizations through versatile services including agile intranet, communication tools such as e-mail and corporate private websites, and network security services. It backs up over-all corporate IT operations with extensive outsourcing services – from infrastructure to SaaS features.

■ Wealth of services for SMBs

"BIGLOBE Office Service" provides everything SMB customers need with respect to the Net, including Internet connectivity, domain names, e-mail, websites, security, groupware, and more.

New Businesses & Business Collaboration

- "New businesses" to propose new value

"Photo Communication" Online Photography Service via PC and Mobile Phone Linkage

"Photo Communication," a new service, links PCs with mobile phones. A subscriber can save photos in an online album, browse them at anytime on a mobile phone, a PC or a TV screen and share them with family and friends.

"Carbon Diet" Visualizes Home CO₂ Emissions

BIGLOBE has developed "Carbon Diet" a project to reduce home power consumption, in conjunction with NEC Corporation. This project was initiated as a trial among our employees, but it is now being employed at local governments as a trial service.

- "Business collaboration" to explore new possibilities together with clients

Universal Studios Japan® & BIGLOBE

Official fan club membership management linked to e-mail promotion

In order to invite visitors to the theme park and to create regulars by organizing an official fan club, Universal Studios Japan® asked BIGLOBE to develop a membership management system. The system sends timely and personalized birthday greetings, campaign information and other e-mails to more than 1.5 million members in order to raise the repeater rate. E-mail handling and large-volume membership management are stably performed within BIGLOBE's robust and secure data center.

Tokyo Broadcasting System Television, Inc. & BIGLOBE

On-demand service platform that integrates mobile sites

Mobile sites interacting with popular TV programs on Tokyo Broadcasting System Television (TBS) must be able to deal with traffic surges. In the past, TBS built and managed multiple sites for each content type. However, they have decided to integrate them in order to improve the quality of services and the level of personal information protection.

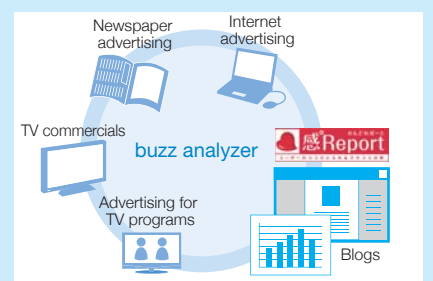

TBS has chosen BIGLOBE's "On-demand Service Platform." "Now we can stay on top of sudden concentrated access to our site," they said.

Hakuhodo DY Intersolutions Inc. & BIGLOBE

"Kando Report" allows multifaceted analysis of the spread of word-of-mouth information and its influence

Hakuhodo DY Intersolutions Inc. has developed an analysis service called the "buzz analyzer." This innovative service can be used to comprehensively analyze the effect of Internet and mass advertising, and the influence of word-of-mouth information postings including blogs, search counts and PR exposure. BIGLOBE's "Kando Report" was selected as the blog analysis engine for "buzz analyzer" and it is built in as the service's core function. High marks have been given for the advanced blog analysis technology that is even able to identify the reason behind popularity.

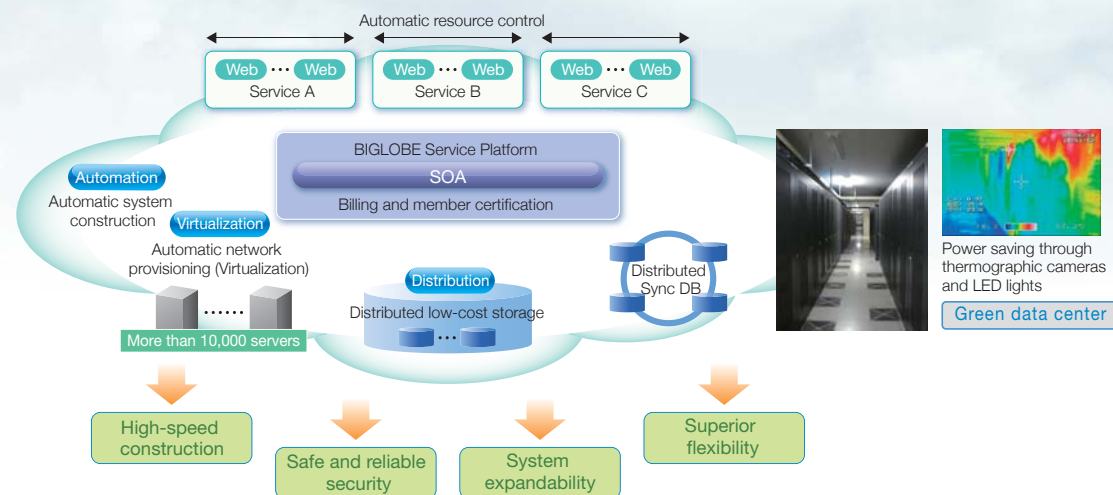

BIGLOBE Service Platform

A concentration of reliability, stability and flexibility for high-quality cloud computing services together with eco-friendly energy saving features

Advanced BIGLOBE Service Platform to Support Cloud Computing

The BIGLOBE Service Platform is a collection of advanced IT technologies. This platform allows the construction of highly secure IT systems on a cloud computing system with a high level of speed and flexibility. Also, the BIGLOBE Data Center has improved its operation efficiency by virtualization, automation and distribution, and realized high expandability and reliability of operation. In addition, we have realized the highest level of domestic energy conservation by using the most advanced eco-friendly equipment.

BIGLOBE Ecology Promotion Activities

BIGLOBE promotes activities that positively reduce environmental impact in order to preserve the irreplaceable environment of our Earth. The search service "BIGLOBE Search" has adopted the concept of carbon offsets, and is planting a eucalyptus tree for every one million searches. We also take our customers on tours so that they can experience our tree-planting program firsthand.

By planting trees, carbon dioxide generated by Web searches is absorbed.

Web search services with low environmental impact

Planting eucalyptus trees on Kangaroo Island, Australia.

NEC Forest

Promotion of Environmental Management Activities

ISO14001

An international standard that specifies an environmental management system for reducing and preventing the generation of environmental effects and risks from organizational activities, products and services. Issued by the Japan Quality Assurance Organization (JQA) BIGLOBE was certified in 2007.

Registration number: JQA-EM5912

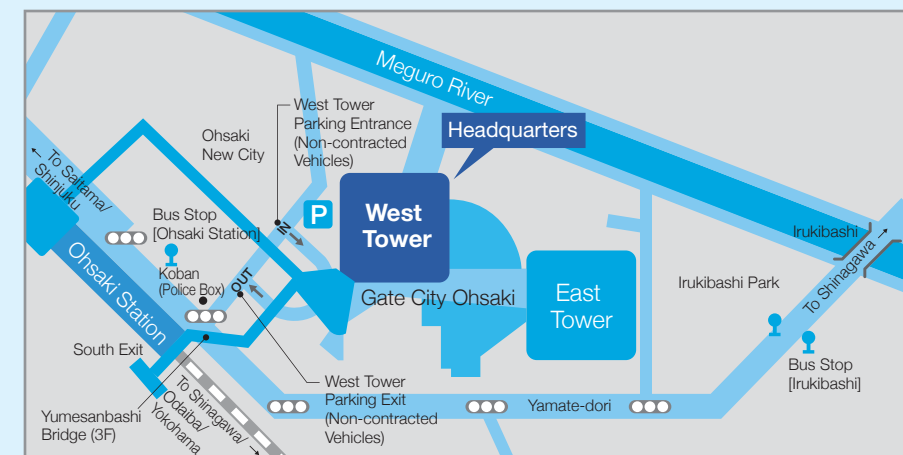

EcoLeaf Logo

EcoLeaf is a registered environmental label for translating the environmental load of services and products into quantitative data for disclosure and for promoting consideration of the environment among users in their selection and use of services and products. Issued by the Japan Environmental Management Association for Industry (Ministry of Economy, Trade and Industry) BIGLOBE was certified in 2006.
